a Installed tools with completed jobs in the most Galaxy runs (15)

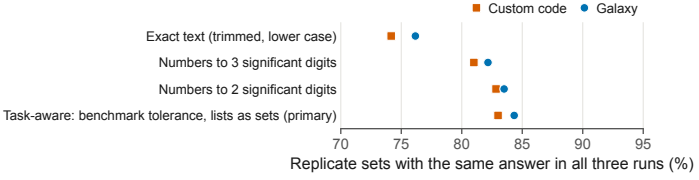

b Tool-set similarity by model

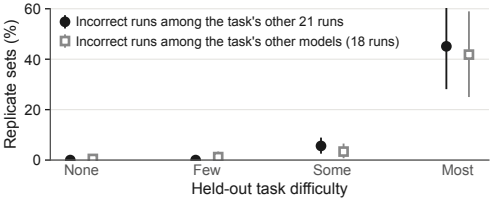

Task similarity against task accuracy, Spearman ρ (tasks)

	BixBench	CompBio	IWC
Panel c (installed tools + one UDT item)	−0.47 (50)	0.06 (100)	0.73 (9)
UDT items dropped	−0.30 (44)	0.11 (72)	0.73 (9)
Cells using installed tools only	−0.33 (32)	0.20 (42)	0.73 (9)
Cells with any UDT	−0.42 (40)	−0.01 (93)	–
Ordered steps (edit distance)	−0.25 (50)	0.08 (100)	0.86 (9)
Tool versions distinguished	−0.28 (50)	0.06 (100)	0.80 (9)
Tools with identical parameters	−0.04 (50)	0.07 (100)	0.47 (9)

c Answer agreement under four answer-matching rules

d Same rejected answer by held-out difficulty, two definitions

e What completed UDT jobs computed

Share of each model's completed UDT jobs by method class (rules on the UDT definition: code first, then a tool-specific container)
