a From a biological task to a benchmark score

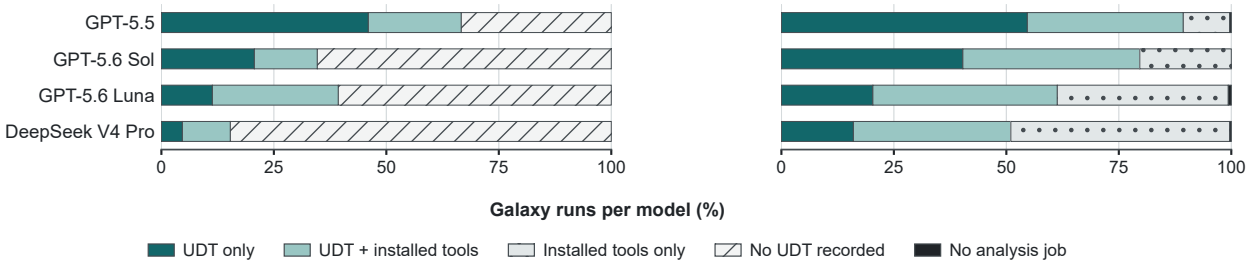

160 tasks × 4 models × 2 policies × 3 replicates = 3,840 runs

b BixBench tool use in Galaxy

39.0% of 600 runs used a user-defined tool

c CompBioBench tool use in Galaxy

70.3% of 1,200 runs used a user-defined tool

d Tracing one yeast RNA-seq result

IWC workflow 002 · GPT-5.5 · Galaxy replicate 1

Inputs	Four prefiltered count tables
Tool	DESeq2 wrapper 2.11.40.8+galaxy4
Output	Dataset 16 with 2,526 genes

e Overlap of significant genes

One column per gene at adjusted P < 0.05
